

What is the "Free Download Mode"?

The so called Free Download Mode is similar to a flatrate: unlimited downloads without download volume being deducted. Currently you can download at 2000 kbit/s using the free download mode.

If your newsreader does not allow switching between modes with the click of a button, you can choose to use the Free Download Mode by connecting to flat.usenext.de - or connect to high.usenext.de for full bandwidth.

Highspeed:

Newsserver: high.usenext.de

Port: 119/443 (Port 563 with SSL)

Your username (avi-xxxxxxxxxxx-xxx)

Your password

Flatrate (up to 2.000 kbit/s):

Newsserver: flat.usenext.de

Port: 119/443 (Port 563 with SSL)

Your username (avi-xxxxxxxxxxx-xxx)

Your password
